Lia Jeffries

Chessington, UK | liavjeffries@gmail.com | github.com/Haylia | linkedin.com/in/liavjeffries | haylia.github.io

Summary

Computer Science graduate (BSc Hons, University of Southampton) who pairs hands-on software development with current KYC and compliance experience at a law firm. Ships real tools (Discord bots, live-service game features and AI-integrated apps) across Python, C#, Kotlin and Go. In a KYC role on complex private-equity structures, handles client due diligence to market standard, and brought coding into the work with a Python tool that automated a manual team-reporting process. Keen to apply that developer-and-compliance blend in a software, regtech or KYC-engineering role.

Technical Skills

- **Proficient**: Python, C#, Java, MySQL
- **Familiar**: Kotlin, Haskell, Go, JavaScript, HTML / CSS
- **Frameworks & Tools**: Unity, .NET, Jetpack Compose, Firebase / Firestore, Git, Discord API, Google Sheets API, Claude / Claude Code
- **Areas**: Packet capture & protocol reverse engineering, LLM API integration (Claude)

Professional Experience

Senior Associate Compliance Solutions Analyst (Inbound KYC) Jul 2025 — Present
Carta Law (formerly Avantia Law) *London, UK*

- Review and respond to inbound KYC requests for complex private-equity structures in a fast-paced environment, often handling many clients at once.
- Assess banks' requirements against market standard, scoping each response to the genuine requirement and pushing back on off-market or excessive asks while keeping clients satisfied.
- Built internal tracking tools, including a Python program that replaced a manual reporting process, to support team performance monitoring and assessment.
- Trained new team members and handled high-volume clients with minimal supervision.
- Early adopter and ongoing member of the power-user group for the firm's bespoke AI-backed workflow tool, which has grown from an early pilot into a full replacement for the previous KYC workflow. Use it for day-to-day KYC delivery and feed back to the internal engineering team as it evolves.

Programmer & Content Builder Mar 2023 — Present
Wardens *Indie game project*

- Co-developed a client–server mobile MMORPG in Unity (C#) in a team of 2–5, backed by a MySQL content database.
- Built boss and gameplay mechanics, while keeping bugs in check.
- Created bespoke content-creation tools: custom tooling (database, effects and content editors) and a content pipeline used by the team.
- Integrated in-game Discord features (account linking, in-game mail/DM) and built supporting web pages.
- Worked on the game's Go server program, which delivers game updates to players.
- Now in beta with around 1,000 registered testers (peaks of around 100 concurrent).

Education

University of Southampton Hampshire, UK
BSc Computer Science *Sep 2020 — Jul 2024*

- Second Class Honours (2:2); programming modules taught primarily in Java.
- Dissertation: "Understanding and Using EEG Readings from the Visual Cortex to Control a Computer", a brain–computer interface driven by visual-cortex EEG signals; marked 62% (2:1).
- Captured and processed signals from a g.tec Unicorn Hybrid Black EEG headset via its Python API to drive on-screen control.

Canford School Dorset, UK
A-levels & GCSEs *Sep 2015 — Jul 2020*

- A-levels: A*AA in Computer Science, Mathematics and Physics, plus AS-level Further Mathematics (A).
- 10 GCSEs (A*–B), including grade 9 in Maths and English.

Projects

Scrawl (github.com/Haylia/Scrawl) Jun 2026 — Present

- Android party game (Kotlin / Jetpack Compose) where players create, store and reuse their own prompt decks, synced via a Firebase / Firestore backend.
- Default decks come from an AI-assisted content pipeline (Claude API); offline-first, unit-tested core with a cloud share-by-code layer. In development.

Preferans Scorer (github.com/Haylia/Pref) Jun 2026 — Present

- Android app (Kotlin / Jetpack Compose, Material 3) that scores Preferans, a trick-taking card game with notoriously intricate scoring.
- Modelled the full rule set (bids, whists, variants, bullet/mountain scoring) as a unit-tested domain layer.

Raid Points Tracker Bot (github.com/Haylia/Gwydion-DKP-bot) Jul 2023 — Present

- Discord-command frontend with a Google Sheets backend for transparent raid loot-point (DKP) tracking in an MMORPG.
- Python (discord.py); concurrent multi-account Sheets access via threading and tasks to keep commands responsive.

Live Combat Parser & Leaderboard Jul 2023 — Jun 2024

- Raw-socket sniffer that reverse-engineered an MMORPG's network protocol to parse live combat events.
- Compiled raid damage leaderboards and synced them to Google Sheets via a service account.

MMO Timer Bot (github.com/Haylia/chtimerbot) Mar 2024 — Present

- Discord bot (Python, discord.py) providing boss and event timers for an MMORPG community across 20 servers.
- Replicated a popular service that was being discontinued, with refinements for onboarding and reliable uptime.

Marvel Rivals Bot (github.com/Haylia/MarvelBot) Feb 2025 — Sep 2025

- Discord bot (Python, discord.py) that tracked player stats and leaderboards for the hero shooter Marvel Rivals.
- Scraped live match data with headless Selenium / Chrome and cached player IDs to speed up lookups.

Personal Website & Portfolio haylia.github.io

- Personal portfolio site (HTML / CSS) on GitHub Pages, presenting my projects and CV.

Volunteering

Charity Shop Volunteer Sep 2024 — Jul 2025

Julia's House *Dorset, UK*

- Till and donations assistant across Julia's House shops in Broadstone and Creekmoor.
- Assisted customers, replenished and organised stock, sorted incoming donations, and digitised book stock into the till system.

Committee Member (Esports) May 2021 — Jan 2022

University of Southampton Video Games & Esports Society *Southampton, UK*

- Represented the Overwatch community on the society committee.
- Founded and managed esports teams, ran community events, and grew member participation.

Interests

- **Esports**: player & captain, University of Southampton Overwatch teams (2020–2024).
- Casual social card game player; tennis, table tennis, skiing and running.

Additional

- Full clean UK driving licence.
- Right to work in the UK.
